

INTERCULTURAL CRAFT: a bridge between knowings and cultures

NEWSLETTER n. 3

In May we had the second meeting in presence of the [INTERCRAFT](#) project, which took place in Athens, with the great ospitality of the Greek project partner [ODYSSEA](#).

The meeting was mainly focused on **WP2**, which is the second work package of the project concerning the **Atlas Map** and the **Joint Curriculum**. The first one consists of a general mapping of intercultural craft experiences, the second one is a

definition of a methodological framework of the training path envisioned by all project partners.

The **Desk Analysis report** was presented and all partners make the first draft on how to structure the learning programme. At the end of the meeting, updates on communication and quality and impact were made by respective task leaders.

The next meeting in presence will take place in Barcelona on 4th and 5th of December.
